

UNITED ALABASTER

"LIGHT IS NOT SO MUCH SOMETHING THAT
REVEALS, AS IT IS ITSELF THE REVELATION"

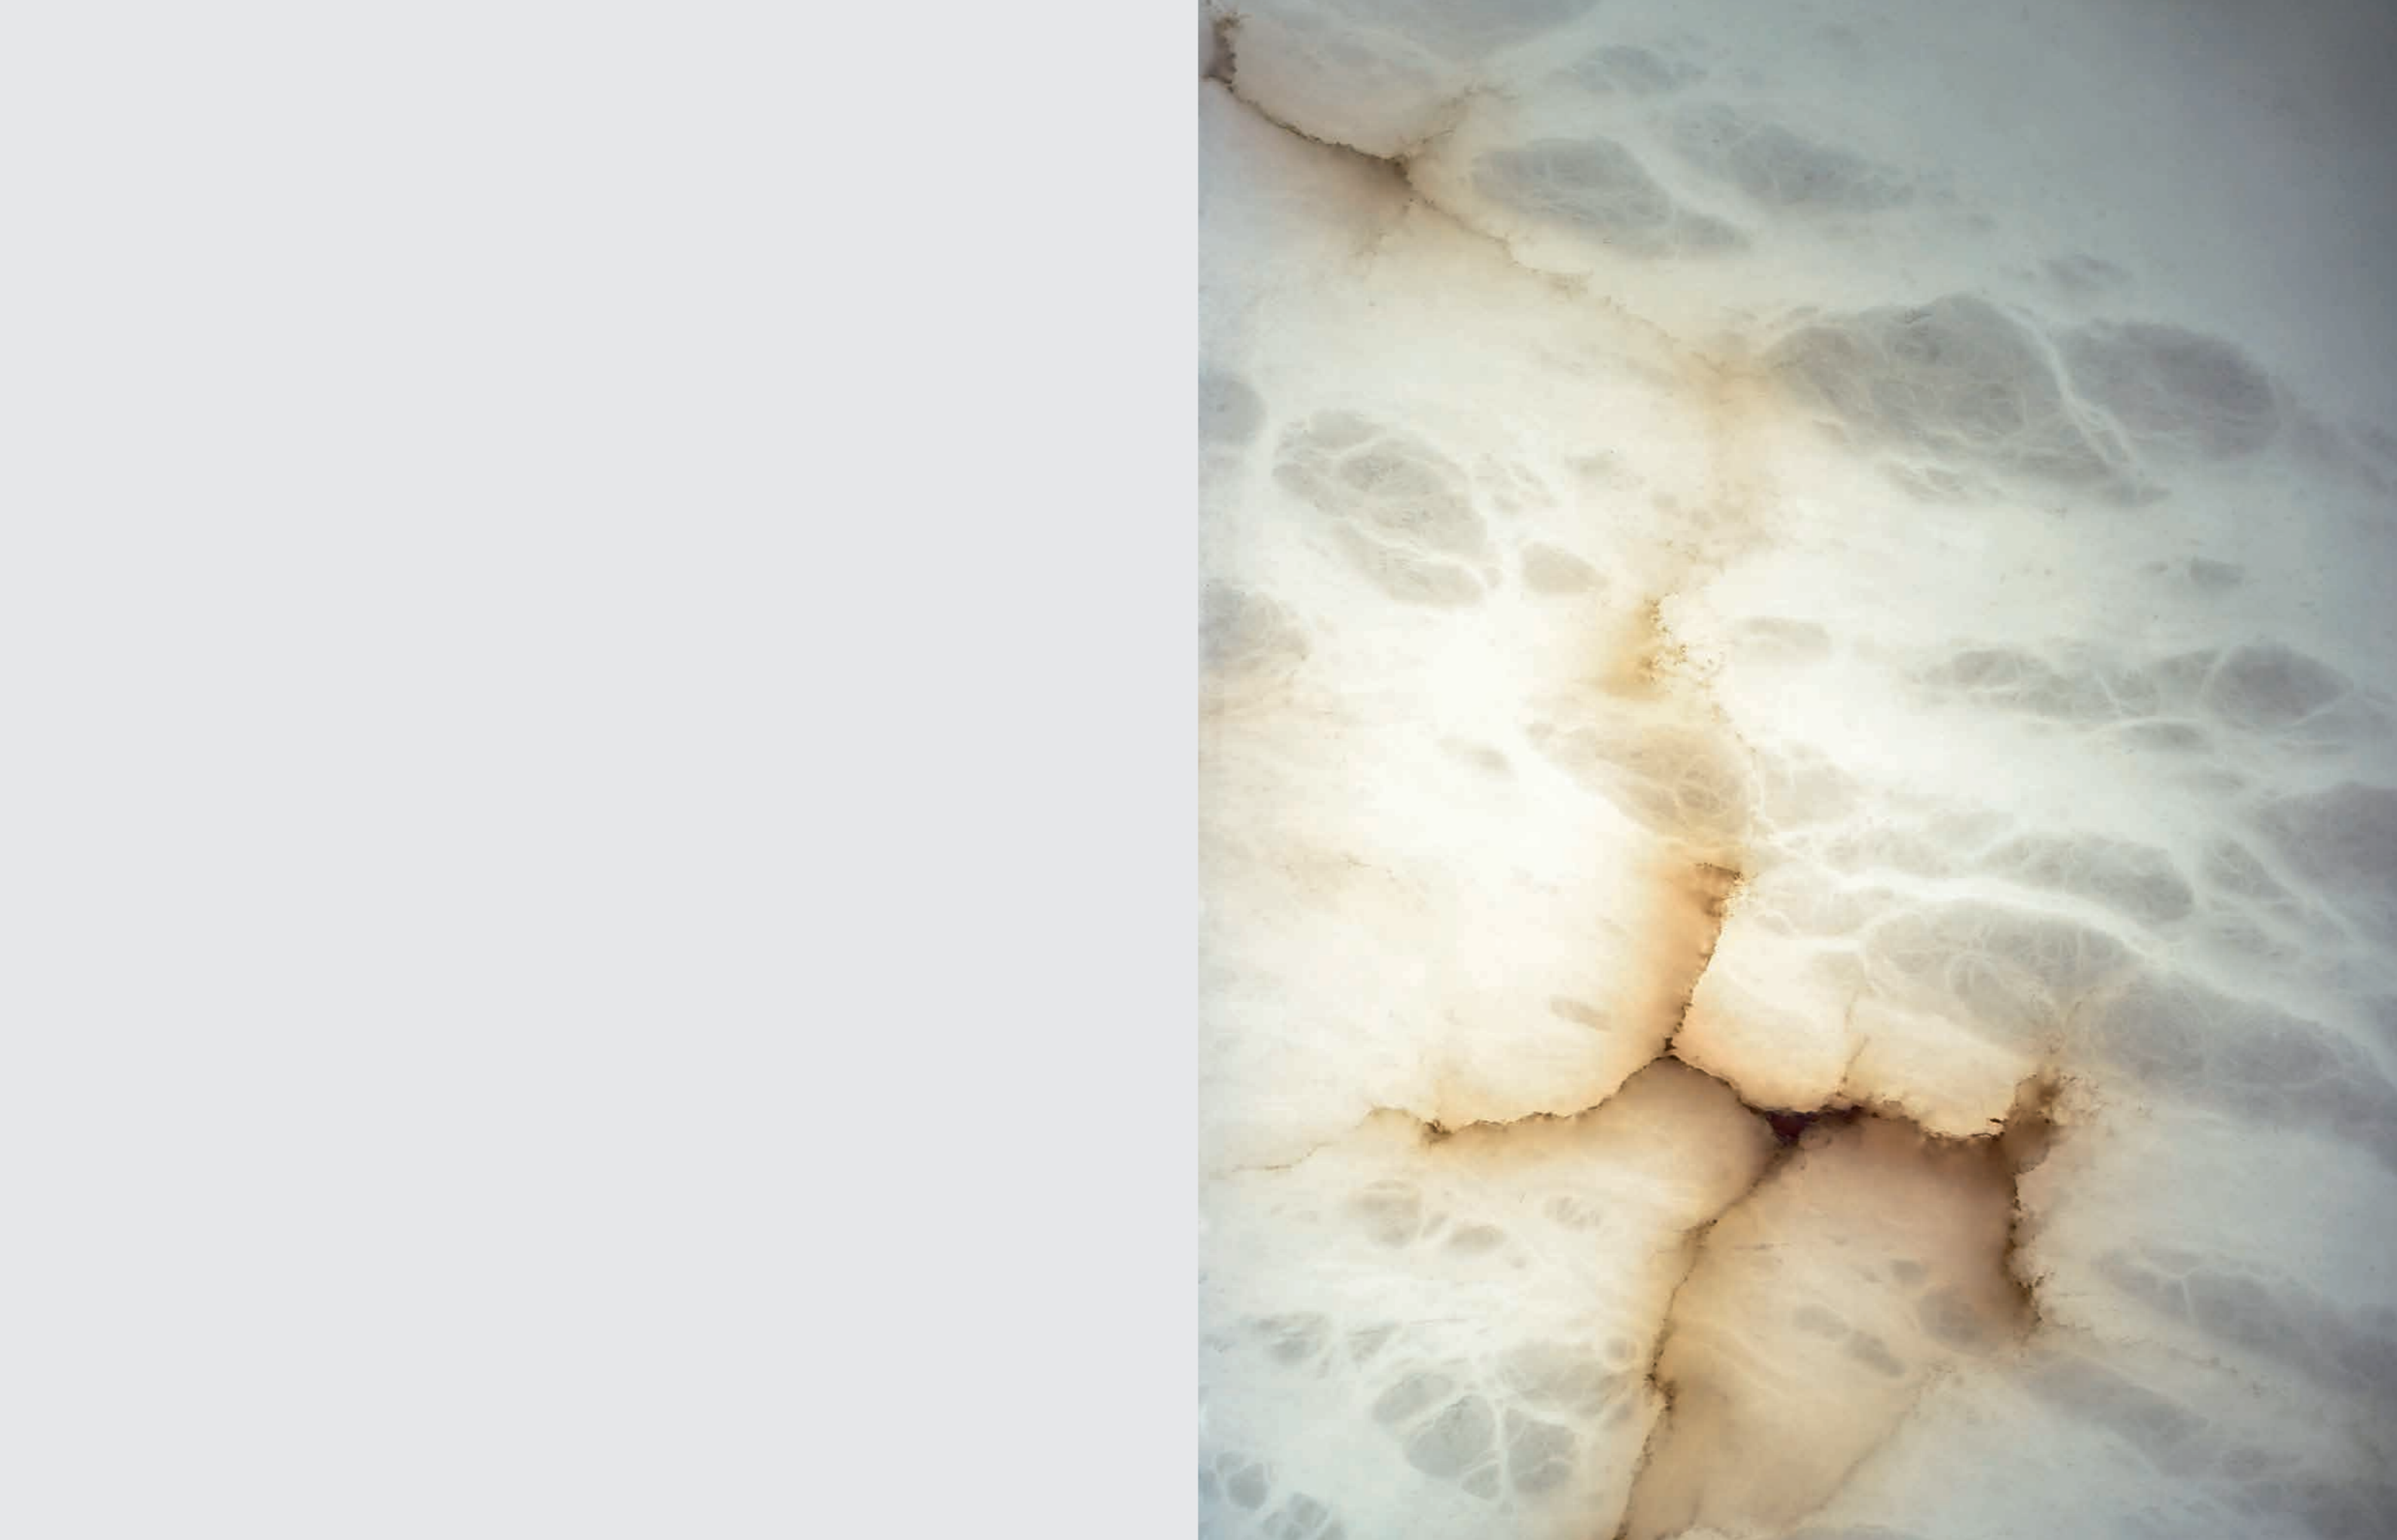

JAMES TURRELL

One of the most significant testimonies of the prestige enjoyed by the aragonés alabaster outside our borders, belongs to the visit that Nicolás de Satarem -Nicolau de Chanterenne- “imaginary king of Portugal“ -John III- paid to the Gelsa quarries in the early 1528, where he bought fifty cartloads of such material.

At United Alabaster, we have gathered together the traditional craftsmen and sculpture artists who have worked this natural stone for a long time. They have adapted to the new technologies and market demands. We have generated a leading business in this field; our policy 'just in time' has allowed us to reach high levels of satisfaction with our clients. The prevailing life of alabaster and its extension into the worldwide market has been demonstrated through our experience at United Alabaster.

Our clients, all over the world, are our proof that this fine material is able to combine traditional handicraft perfectly with new treatments, manufactures and technologies and is adaptable to the new demands of design and applications in new architecture.

Tradition in Alabaster since 1969

United Alabaster, located in Sarral (1969), is one of the oldest companies in Spain in the alabaster sector. It is still a family business dedicated to meeting the needs of its clients.

United Alabaster, one of the oldest companies in Spain in the alabaster sector, manufactures exclusive products to meet the needs of design and satisfy the needs of lovers of design and architectural lighting.

The company is a seal of quality and a benchmark in architecture, lighting and design.

It brings "illuminable" stone to the best international projects. In addition, it owns more than 100 mining sites from which it can extract different varieties of alabaster, thus offering an even more special product with designation of origin.

Thanks to its extensive staff, they can offer all their skills and knowledge to make exclusive design products. Our mission is to fuse this

natural stone with contemporary elements while respecting the environment and innovating in their applications. The service offered and the confidentiality of the lighting projects and architecture along with the experience gained during all these years are the key to success.

Among our products, you can find wall lights, lamps, panels, and table lamps. All of them made of first quality alabaster extracted from our quarries in La Puebla de Híjar (Teruel). Nowadays, this material surprises everybody in many interior spaces from around the world such as entrance halls, hotel rooms, restaurants, cruisers, churches or private residences, bringing warmth and harmony.

*The difference between something
good and something great is
attention to detail.*

The Stone Gelsa, Ribera Baja del Ebro

First quality alabaster extracted from the quarries in La Puebla de Híjar (Teruel) and Gelsa (Zaragoza). Born from an original vein in the quarry and moulded in their workshop.

ONE OF THE MOST SIGNIFICANT TESTIMONIES OF THE PRESTIGE ENJOYED BY THE ARAGONÉS ALABASTER OUTSIDE OUR BORDERS, BELONGS TO THE VISIT THAT NICOLÁS DE SATAREM -NICOLAU DE CHANTERENNE- "IMAGINARY KING OF PORTUGAL" -JOHN III- PAID TO THE GELSA QUARRIES IN THE EARLY 1528, WHERE HE BOUGHT FIFTY CARTLOADS OF SUCH MATERIAL.

Our production begins in our alabaster quarries in Gelsa (Zaragoza) we will place our alabaster mineral reserves at your disposal, unique in the world.

Our professional specialists in quarries locate and extract the mineral using the latest technologies established in our companies and coordinated by our office of Mining Engineers who coordinate and supervise the exploitation.

Exhaustive quality controls and the historic origin guarantee the material through its geographical location. The material extracted in large balls is sent to the sawmill where we clean and cut the material to prepare it in different formats for processing in the alabaster factories.

Our design of Alabaster articles is an example of the personalisation and exclusivity

New technologies allow us to satisfy the most creative need of our clients.

For more than 50 years, United Alabaster has got a team of people committed to their work, providing value to a natural Stone and undertaking very demanding projects using state-of-the-art machinery.

Our speciality is making articles according to the wishes and demands of the professionals at illumination projects.

The application of alabaster in new architecture allows us to make large walls for all type of shapes that will improve the elegant translucent effects of this material.

In United Alabaster process of manufacture your exacting demands are guaranteed due to the application of our technology with machines for slabbing and profiling 3D pieces in production

system. This was created to produce incredible panels with various and intricate shapes that guarantee a wide range of possibilities we carry out. Designers, developers and customers are unanimous: Alabaster is the new star.

Everything unimaginable is achieved in a white, calm and relaxing environment. The stone volumes take all the lead of the ambience where the technical staff study and develop the best creative proposal.

The manufacture of an alabaster lamp

United Alabaster process of manufacture is guaranteed due to the high technology of the state-of-the-art machinery used to develop any design, no matter how complex.

The selection of the alabaster is one of the most important decisions that our team and designers or architects make when creating a building or designing an interior. In continuous development makes collaborations with the Geologic department of the University of Zaragoza developing the alabaster I+D, positioning our company at worldwide level.

Our design of alabaster articles is an example of the personalization and exclusivity, being one of the special features of the alabaster at United Alabaster. New technologies allow us to satisfy the most exacting needs of our clients. Our specialty is making articles according to the wishes and demands of the professionals at illumination projects.

At United Alabaster you could personalize projects for hotels, restaurants, halls, enterprises so to reach pleasant and cozy corners, elegant villages, lounges or rooms. The application of alabaster in new architecture allows us to make large bowls for all type of walls that will improve the elegant translucent effects of this natural material. Our process of manufacture to your exacting demands is guaranteed due to the application of our technology W.A.C. (wide-angle cutting) in the production system.

This was created to produce incredible and large bowls with various and intricate shapes that guarantee a wide range of possibilities we carry out.

Madrid, meeting with alabaster

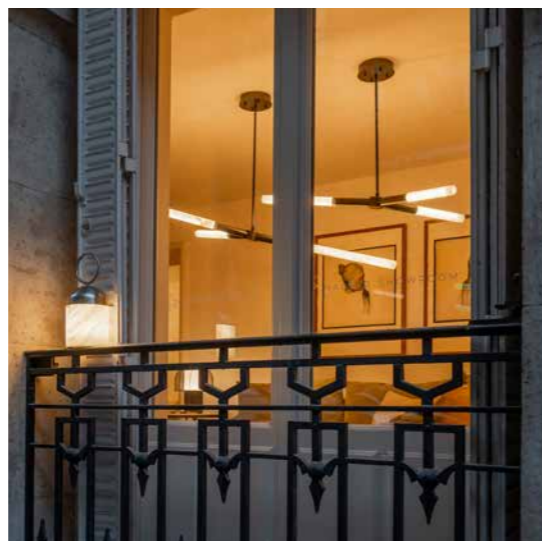

Explore the unique beauty of Alabaster in our showroom by Blasco in Madrid. It solidifies itself as an unmissable meeting point for professionals and clients seeking experiences beyond the conventional.

Welcome to our exclusive space in the heart of Madrid, in Salamanca district, where elegance and innovation merge to create unique experiences. In our Showroom you will be immersed in a world of exceptional design and customized solutions, all in a welcoming and avant-garde atmosphere.

We invite you to immerse yourself in the very essence of alabaster lighting. As a lamp manufacturer with a strong tradition of creating unique projects, we have taken the beauty of this natural stone to the next level.

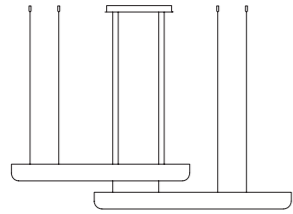

The texture and translucency of alabaster allows it to filter light in a unique way, creating fascinating plays of light and shadow. Each piece of alabaster is unique in itself, making each alabaster lighting project an exclusive and personalized piece of work.

We will be happy to assist you and discover how to make your projects stand out.

Up & Down

Ceiling Lamp

The Up & Down lamp is a work of art in natural stone, inspired by the relationship between earth and sky. This lamp is a modern interpretation of the way natural stone emerges from the earth and rises towards the sky. It is composed of 3 spheres of natural alabaster stone carefully selected from our quarries. Is presented with a vertical metal structure that extends upwards from the stone base. This metal structure holds three spheres of light that shine up and down, illuminating their surroundings and highlighting the beauty of the natural stone. The combination of natural stone and metal creates an elegant contrast in any room. The high quality natural stone is complemented by the black metal, creating a lamp that is both stunning and sophisticated.

Ypsilon byBlasco

Ceiling Lamp

Ypsilon, a lamp designed by ByBlasco, takes its name from the letter Y in the Greek alphabet. In its tubes that converge on a single axis, we can see the shape of this letter. Metal and alabaster are combined in this design creating a monumental piece. In addition, its axis allows us to rotate the luminaire, giving us the possibility of adapting it to any space.

Tube

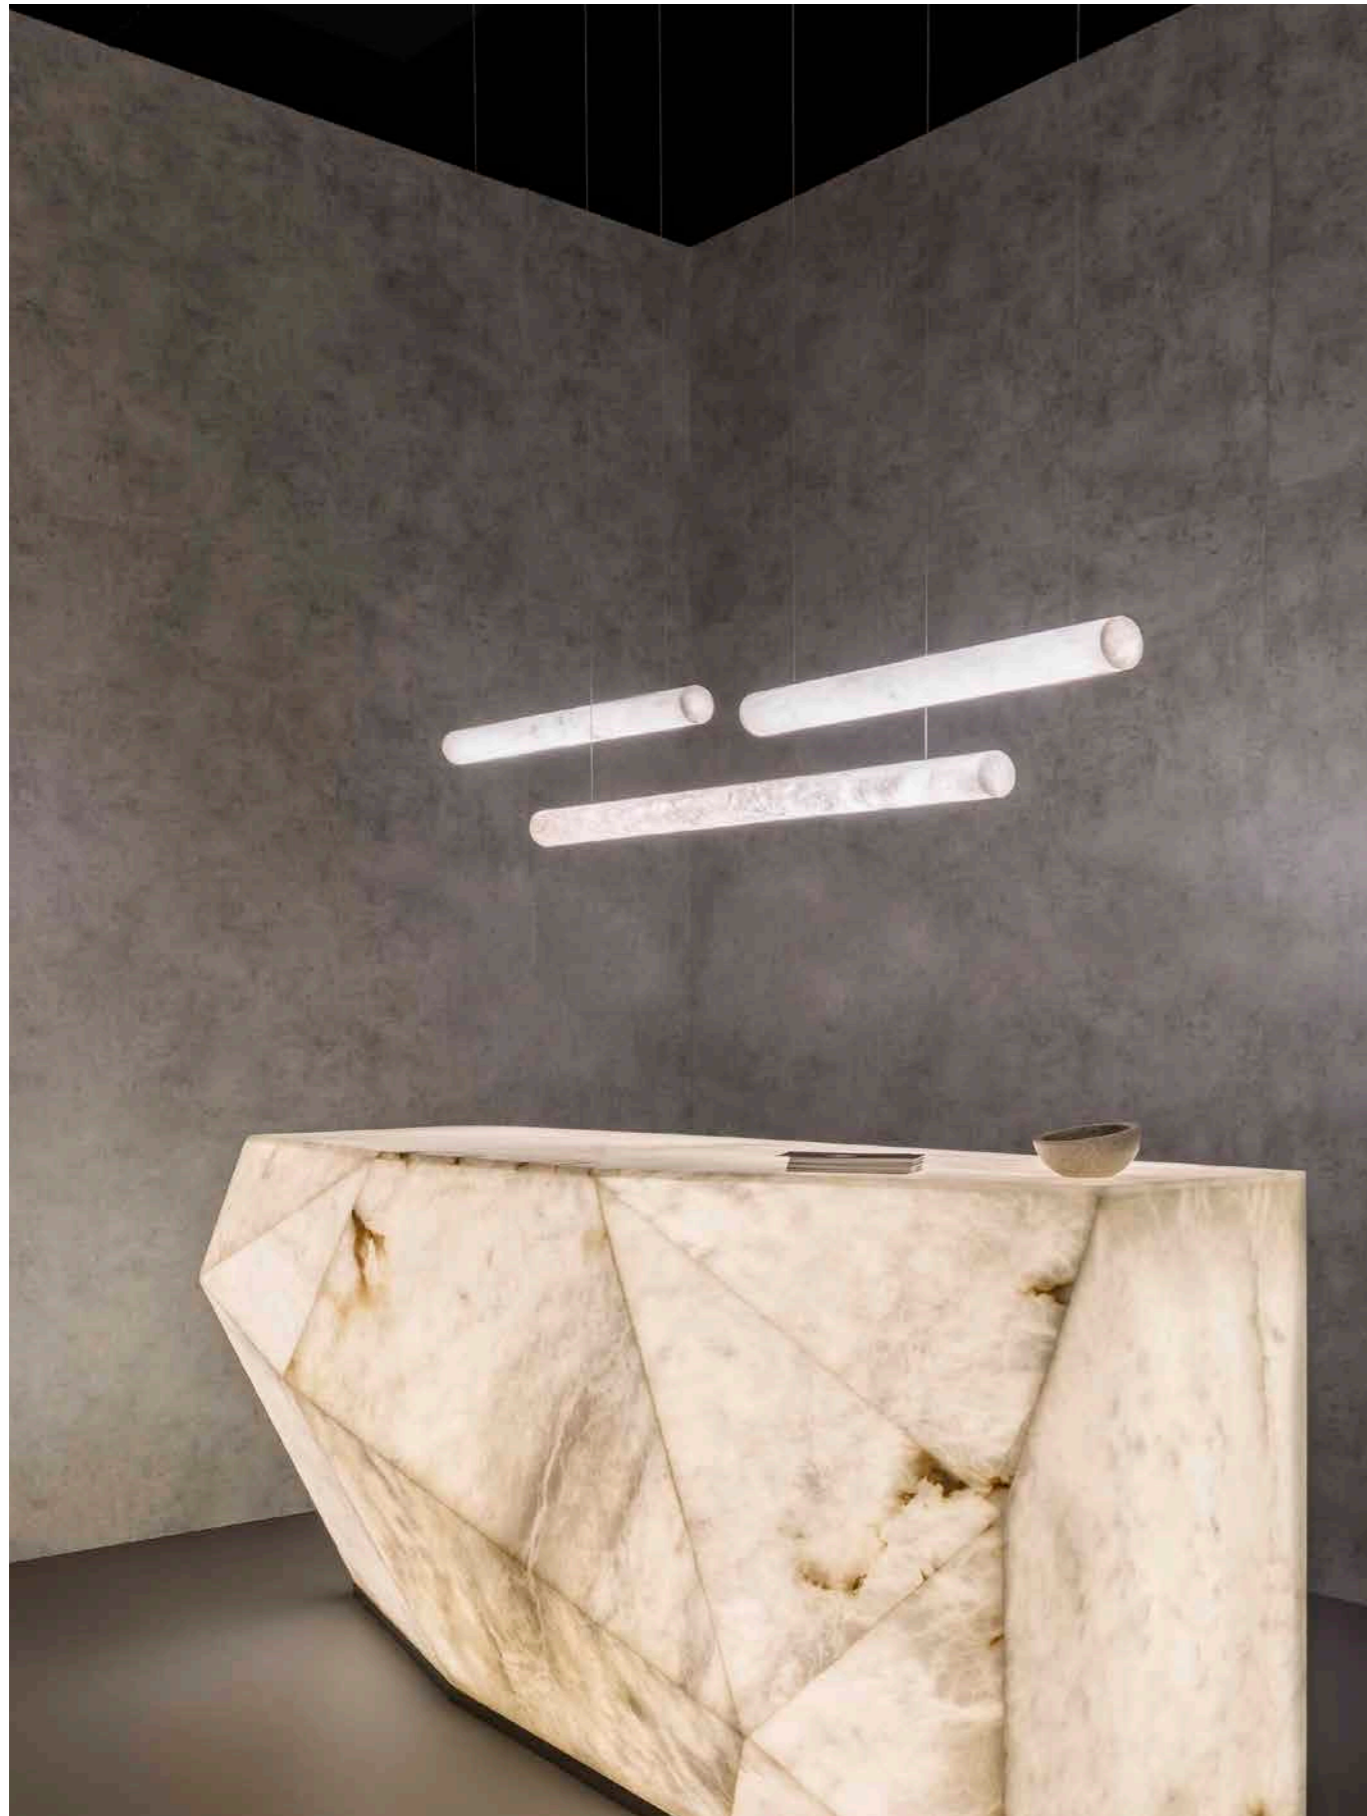

Ceiling Lamp

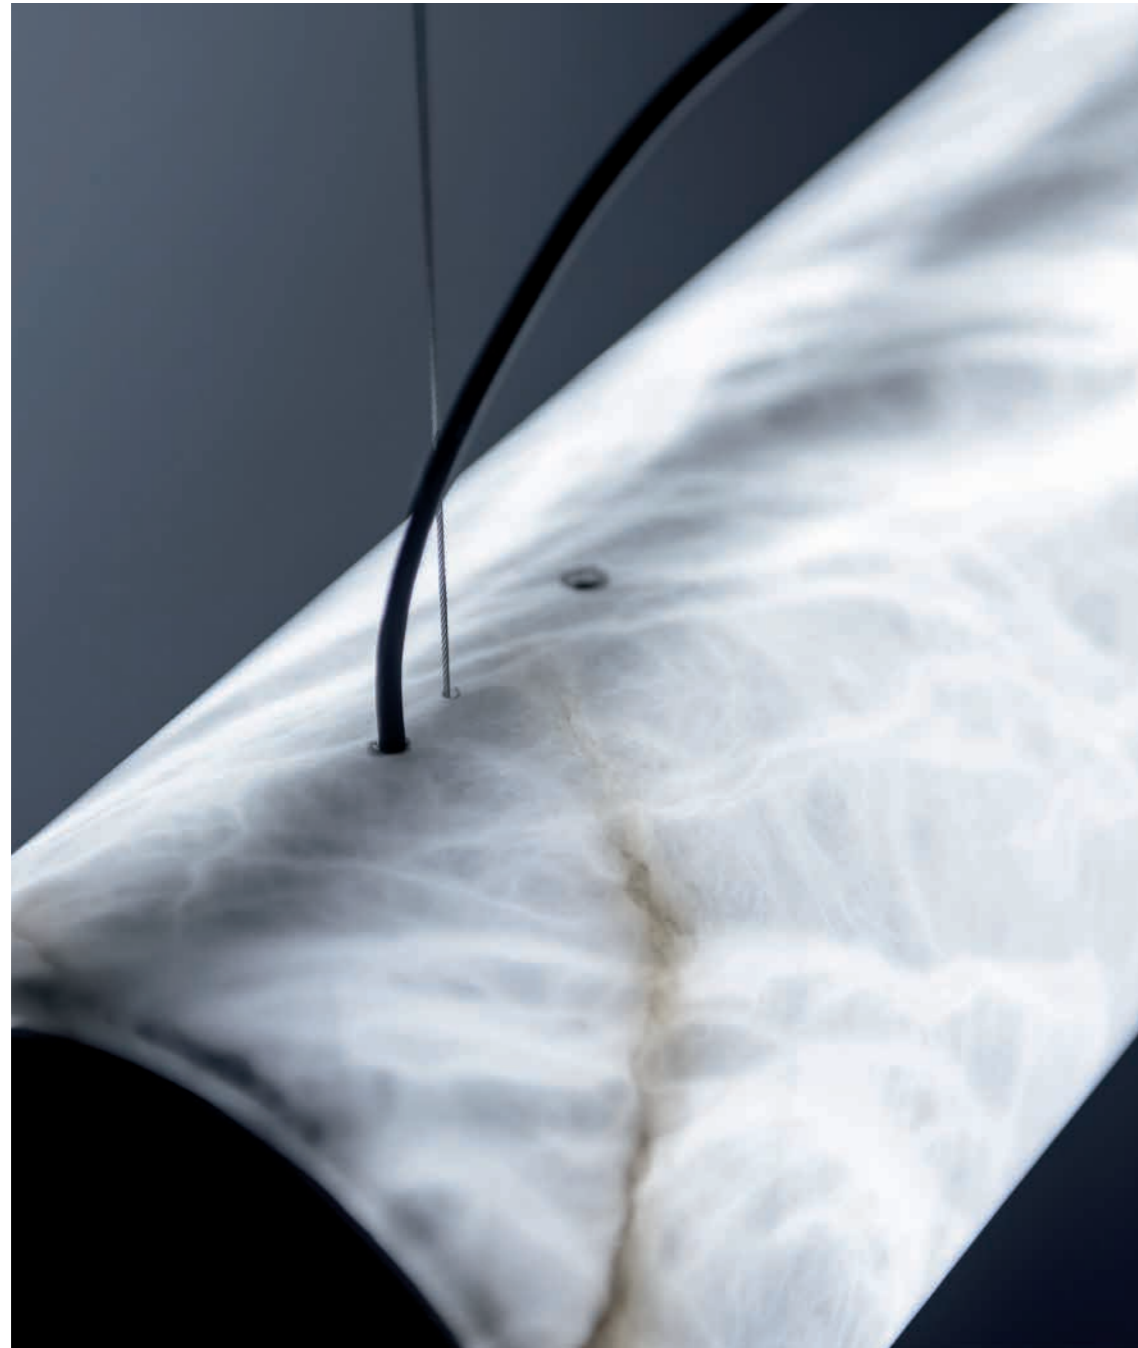

Tube was created in search of the horizontality of the products. The purity of alabaster in a one-piece tube with its ends finished in metal and suspended by minimalist, height-adjustable steel cables.

The light emission is 360° in order to fully enjoy the translucency of the alabaster. We have worked to avoid shadows inside the screen, emitting a very pleasant ambient light to create relaxing atmospheres.

Mirror

Wall Lamp

Wavy alabaster discs combine with mirrored and marble discs to create play of light and reflections. Luminaires that slightly protrude from the walls or ceilings where they are installed. By forming groups of Mirror Disc in different sizes, indirect, diffuse and also reflected light effects are achieved through the mirrors. Designed by Joan Casanyes.

Wireless Glans

Table Lamp

Wireless Glans was born from the need to make one of our most iconic models a new design. The organic shape of the acorn-shaped alabaster makes this design a special piece. The technical and aesthetic innovation in this design, its metal ring and its wireless system allows us to illuminate any of our spaces in our home with a warm light. Designed by Joan Casanyes.

Panels

Custom Design

For custom projects where the light and the naturalness of the stone are the protagonists. Custom projects are carried out with illuminated panels pre-configured with led light, admirable to see. Its installation is made from a profiled structure of polished and satin stainless steel that acts as a support for the panels and facilitates their construction. They can be applied horizontally or vertically, and can be wavy or smooth. Each panel has its beauty and the whole set becomes a contemporary element for hotels, shops, airports or restaurants.

WE HAVE THE FORMULA
TO LIGHT UP YOUR COLLECTION
WITH ALABASTER

UNITED ALABASTER, DESIGNER LIGHTING IN ALABASTER SINCE 1969

United Alabaster creates unique designer lamps made from alabaster, exporting local craftsmanship around the world.

Creativity, design and innovation define this project with more than 50 years of experience, hard work and perseverance.

Exhaustive quality controls and historical origin guarantee the material through its geographical location. The material, which is extracted in big balls, is sent to the sawmill where we clean and cut the material to prepare it in different formats for its processing in the alabaster workshops.

The Gelsa alabaster extracted from an original vein in the quarry is moulded by the craftsmen's hands of United Alabaster to shape them.

The application of alabaster to the new architecture, allow us to create big walls for any type of form that improve the elegant translucent effects of this material.

We propose the union of a historical natural stone with contemporary elements, metals, wall and ceiling linings, cutting-edge lighting designs. Alabaster, metal or wood structures, finishes, all originates from a whole, without forgetting the great responsibility to reach the ideal combination for each project.

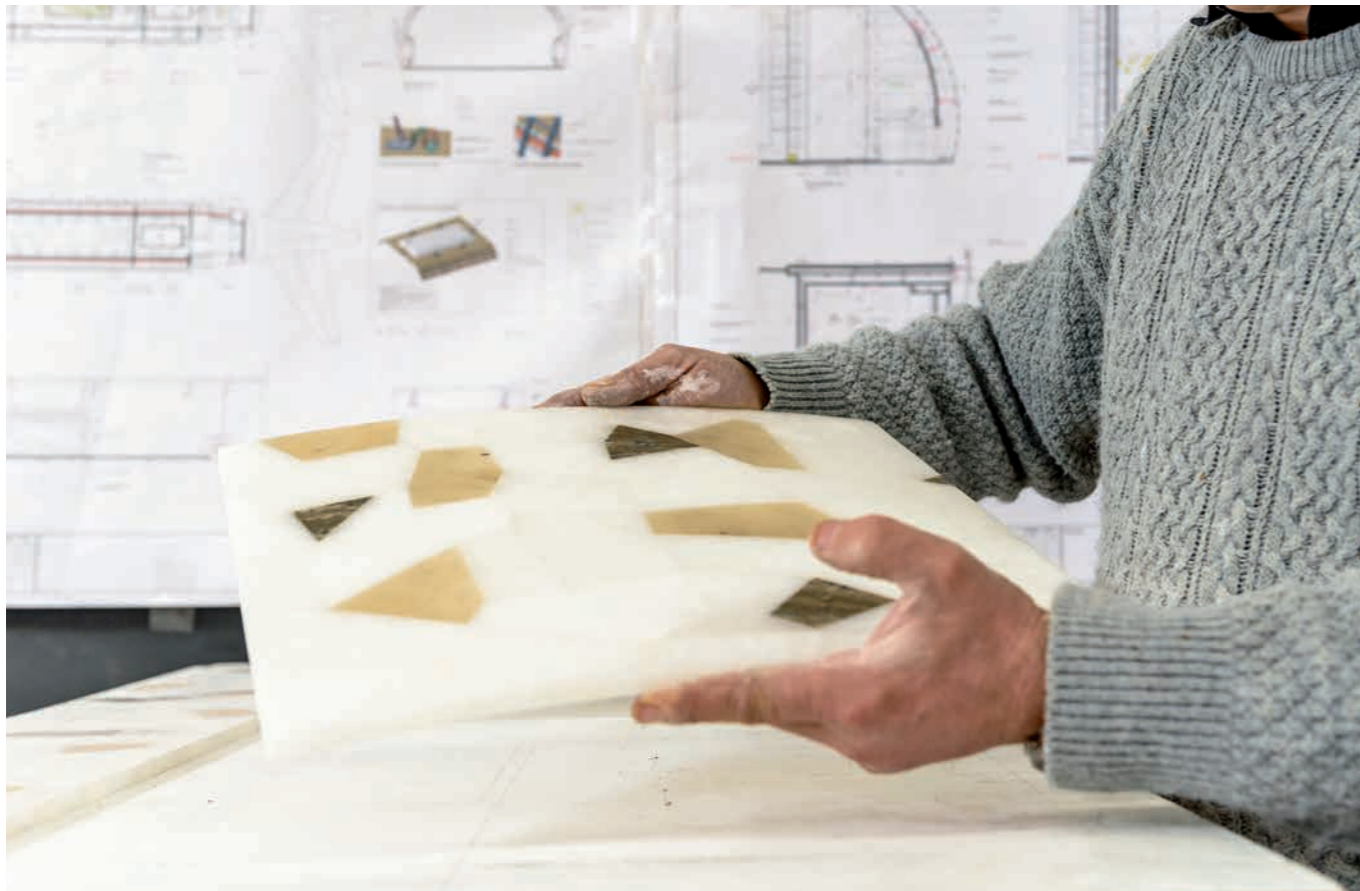

In addition to the product catalogue, United Alabaster carries out customised projects. Customers send their proposals and the technical team assesses the feasibility and offers solutions to make everything imaginable a reality.

The company makes custom-made lighting projects in lamps, alabaster panels and alabaster plates, in all types of environments and rooms in the most important cities all over the world.

Definitively it is a surprising material for the current interior designs.

Get inspired to design your world!
